Aims and Objectives

This presentation aims to discuss how new materials, such as more realistic-looking S.PE/DCL denture teeth and the new generation of Sr Nexco gingival composites, allow us to create the most realistic-looking restorations to date. It will also explain what makes up the gingival tissues and how to recreate the different elements in gingival composite, as well as providing a live demonstration of how to apply and layer Sr Nexco gingival composite onto acrylic.

Learning Outcome:

- Learn how combining new materials can create realistic-looking restorations
- Understand what makes up the gingival tissues
- Understand how to recreate the different elements in gingival composite
- Learn how to accurately and quickly match and recreate gingival tissues
- Understand, following a live demonstration, how to apply and layer Sr Nexco gingival composite onto acrylic

To book your place on the above lecture please contact us
at the BIDST Office on 01159 683 182 or email secretary@bidst.org

For BIDST members the event is free, for non BIDST members the cost is £40, however suitably qualified technicians can reclaim the cost when applying to join BIDST at a lecture.
